PORTFOLIO PROJECTS

- Animegram – Animation Movie Directory**
A sleek and simple web app for discovering animated movies. Users can browse, search, and get details about different animated films. It serves as a fan-friendly directory, especially for anime and animated film enthusiasts looking for recommendations and information.
- FUTO Library – University E-Library System**
An online bookstore and digital library built for a university, designed to allow students and faculty to buy academic books even after school hours. It streamlines the process of discovering and purchasing textbooks and reference materials, increasing accessibility and convenience.
- Hemsoft – Hospital Equipment Management System**
A web application that helps hospitals manage and track their medical equipment. Hospitals can monitor equipment conditions, get alerts for maintenance, and maintain an updated inventory. This improves efficiency and ensures medical tools are always in optimal working condition.
- Elech – Footwear E-commerce Web App**
An e-commerce site built for Elech, a handmade footwear brand. It allows customers to browse the catalog, customize orders, and purchase shoes online. The app supports a clean shopping experience tailored to a brand that values craftsmanship and personalization.,
- ElechAdmin – Inventory & Sales Management Dashboard**
An internal admin dashboard built for **Elech** to manage product inventory, track customer orders, and monitor sales performance. It provides key business insights such as revenue growth trends, best-selling products, and stock levels, helping the business make informed decisions and scale operations efficiently.
- ScholarHub – Decentralized Scholarship Platform**
A blockchain-based platform where students can apply for scholarships and receive funds in crypto tokens. It promotes transparency and global accessibility in scholarship distribution by leveraging decentralized technology. The platform includes application tracking, fund distribution, and secure identity verification.
- ChicChic App – Beauty and Wellness Booking Platform**
A user-friendly web app that lets clients book beauty and massage sessions at their convenience. Users can browse services, schedule appointments, and receive reminders. The app aims to simplify and digitalize booking for salons, spas, and freelance beauticians.
- Ticketopia – Stablecoin-Powered Event Ticketing App**
An event ticketing platform that allows users to purchase tickets using stable cryptocurrencies. Designed for crypto-savvy audiences, it provides a secure and borderless payment experience while making event access fast, digital, and tamper-proof.
